Mr. Ron B. Schiller,
7657 La Bolsa Drive,
Dallas, Texas 75248,
U. S. A.

Dear Mr. Schiller,

We are very pleased to receive your Reception Report of NBS 610 RADIO's Transmission on 610 KHz in Florida. We wish to verify that the details you submitted are correct according to our Transmission Log for January 5, 1976.

You will be interested to know that NBS 610 RADIO operates on 610 KHz with a power of 10 kilowatts, using a single tower, 360 feet high, radiation being omnidirectional. We transmit also on 98.8 MHz FM with 250 watts using an Andrew Multi-V Antenna System and also on FM Stereo on 100 MHz with 3 kilowatts.

We are presently installing a CCA 50KW Transmitter on 610 KHz. We would like to get a SINPO report from you when we are on the air, so you can expect to hear from us soon.

Regarding the call sign VPL-6, this has never been used except during engineering tests quite a long time ago.

Best regards,

Yours sincerely,

for Frank Thompson
Chief Engineer
